

Tell Me About Yourself?

- Rules of answering any HR question.*
- How to respond to this question?*
- Examples*

Rules of answering any HR question

1. Crisp answer i.e. clear and effective.

2. It should be only about you, resonates with the job you have applied for, and should not contain any negative points.

3. Never lie.

Response to "Tell Me About Yourself?"

Your response should include...

1. Work Experience - Company name, your designation, project, and achievement if any (share your key accomplishment).

2. Talk about education - Don't mention CGPA if you have a low CGPA.

3. Mention any side project you did (if any)/ Certification (if any related to the job only)/ Achievement/ Skills relevant to job role/ Activities related to the job profile.

4. You can talk about your short-term goal or long-term goal as well and tell the interviewer how getting a job in the company will help you to achieve these goals.

EXAMPLE 1

“I am pursuing B.Tech. in Computer Science from <XYZ> University. Currently, I am working on a Question Answering System Using Natural Language Processing. The goal of this project is to provide the most relevant answers to the input question asked in the given context. It has practical applications in various domains like search engines, chatbots, collaborative learning environments, personal assistance, health care, and education.

Before this, I worked on a Food Delivery Android App where I created a Login Screen, Add Food Item Screen, and Place Order Screen. I am an advanced problem-solving certified by Hackerrank. I am among the top 9% of the coders on Leetcode Coding Platform which is a community of 2 lakhs coders. That’s all about me. Thank You.”

By Ashay Nayak

EXAMPLE 2

I've been in the IT industry for over seven years, primarily working in the e-commerce and fintech sectors. I am skilled in Java, No-SQL databases, a high scale messaging system, and big data technologies. At present, I am working on a Bidder Ad Serving Project that is responsible for fetching the bids, conducting real-time auctions, and displaying the Ads on publishers.

I have also built multiple features which reduce the latency of trading transactions with the help of efficient low level and high-level designing. I am looking to grow as a software developer and want to be a part of a company that pushes the boundaries of innovation, and working with your company will help me to continually learn and develop. That's all about me. Thank You
