

- Shortest JSCode- empty file
- GLOBAL execution Context is created and also sets up the memory space\
- JSengine creates something known as WINDOW
- It contains various FUNCTIONS& VARIABLEr created by JSengine
- WINDOW is actually a "GLOBAL" object which is created along with GEC.
- Along with GECa "THIS" variable is created. here, "This" points to "Window".
- this === window => true

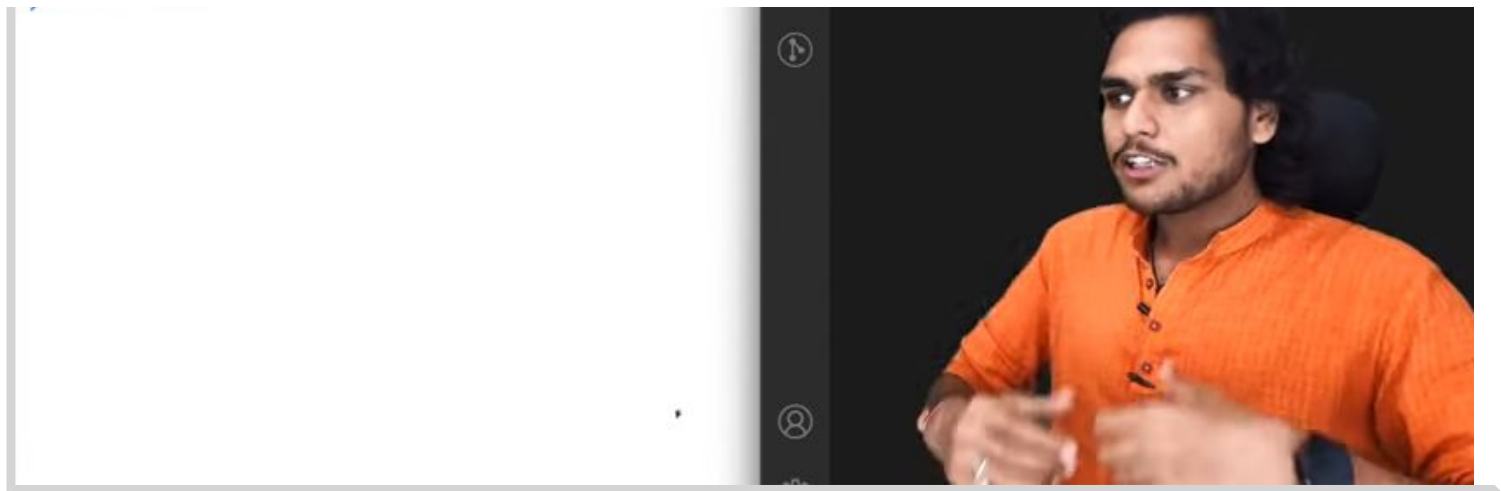

04:10

GLOBAL SPACE- Any code u write in JS which is not inside any a function , that code is in global space
